

ENTERPRISE FINANCIAL INTELLIGENCE PLATFORM

DClaw Finance

AI-augmented financial management for enterprise teams.
Every workflow — from expense entry to board report — is intelligent, predictive, and grounded in real data.

FastAPI · Python 3.11 · Next.js 14 App Router · PostgreSQL 16 · Docker · Kubernetes · Helm · OpenRouter · Anthropic Claude · Tailwind CSS · shadcn/ui

THE PLATFORM

One platform. All your finance data.

DClaw Finance is a full-stack enterprise financial management platform built on the One Convergence design system and powered by DKube's private AI infrastructure philosophy — your data, your infrastructure, full control.

It replaces fragmented spreadsheets, disconnected invoice tools, and reactive reporting with a single, AI-augmented system that knows your numbers as well as you do.

Invoice & expense management
Full CRUD for invoices, line items, expenses, vendors. Category filters, status tracking, tax handling.

AI at every decision point
Auto-categorise, OCR receipts, draft reminders, detect anomalies, forecast cash flow, answer questions in plain English.

Predictive financial intelligence
12-month trend charts, 3-month exponential smoothing forecast, client profitability scoring, budget guardrails.

Private, compliant, on-premise
Runs entirely on your infrastructure via Docker Compose or Kubernetes. No data leaves your environment.

AI FEATURE SET · V1.2 · ALL IN PRODUCTION

11 AI capabilities, zero manual steps.

4 × P0 core · 4 × P1 Intelligent · 3 × P2 differentiating

Expense auto-categorisation
600ms debounce → AI suggests category + confidence from vendor & description.
claude-haiku-4-5 · ~50 tokens

Receipt OCR
Drag-and-drop receipt image → vision API extracts vendor, amount, date, category.
claude-haiku-4-5 · vision

Reminder drafts
One click on overdue invoice → professional email draft with editable subject + body.
claude-sonnet-4-6 · ~250 tok

12-month trend chart
Real DB-backed monthly aggregation. Revenue vs expenses LineChart on dashboard.
No LLM · pure DB query

Cash flow forecast
6-month trailing data, exponential smoothing α=0.3, 3-month projection with confidence bands.
No LLM · statistics stdlib

Anomaly detection
z-score > 2 per category flags outliers. Batched LLM explanation. 1h in-memory cache.
claude-haiku-4-5 · batched

Monthly executive report
Revenue vs expenses, top cost drivers, 3 actionable recommendations. Plain-text output.
claude-sonnet-4-6 · ~1k tok

Line-item suggestions
After first invoice line item → 3 AI-suggested additions based on client history.
claude-haiku-4-5 · ~200 tok

Natural language Q&A
Agentic tool-use loop with 4 DB query tools. "What did we spend on AWS last quarter?"
claude-sonnet-4-6 · tool use

Budget AI guardrails
≥80% utilisation triggers. One specific cost-cutting action per breached category.
claude-haiku-4-5 · conditional

Client profitability scoring
Composite score: revenue 70% + outstanding balance 30%. Batched insights, 24h cache.
claude-haiku-4-5 · 24h cache

AI COST STRATEGY
haiku for fast, cheap tasks.
sonnet for reasoning tasks.
?dry_run=true on all AI endpoints.
Column caching cuts costs 80%+.
OpenRouter or Anthropic — swappable via one factory.

FINANCIAL PERFORMANCE · DEMO DATA · FY 2025–26

Meridian AI Technologies — 12-month snapshot.

MONTHLY PAID REVENUE · MAY 2025 — APR 2026

May	₹4.55 Cr
Jun	₹4.60 Cr
Jul	₹2.55 Cr
Aug	₹1.80 Cr
Sep	₹4.70 Cr
Oct	₹2.20 Cr
Nov	₹5.25 Cr
